PROFESSIONAL

Delivery and storage

All of our products are packed appropriately in cardboard boxes for transport by aeroplane, lorry or ship. Careful handling and optimal product protection are absolutely essential during transport. You can be certain that you will receive our products in perfect condition.

Protective film

Our chocolate and confectionery specialities are delivered in transparent films, some of which are two-part, which provide reliable all-round protection.

Sealing

Each film is hermetically sealed with transparent plastic. This ensures that the products are readily visible while also guaranteeing optimal climatic conditions.

Transport packaging

You will receive your order in a sturdy cardboard box in order to ensure the best possible protection regardless of the type of transport. These cardboard boxes are also perfect for storing our products.

Straightforward inventory management

Our boxes are standardised. The practical format and light weight simplify storage maintenance and restocking.

Storage and shelf life

The ideal storage temperature is 16–18°C with an optimal humidity level of 50%. You can find precise shelf life details in the price lists.
